

# Service Specialist Capabilities

**Our elite group of Service Specialists is constantly trained in the service and maintenance of glass-lined steel equipment regardless of manufacturer, and all applicable OSHA and National Board regulations.**

Our Specialists offer the following services for your equipment needs, at competitive rates:

- Installation of metal repair plugs, patches and inside, outside or combination sleeves in tantalum.
- Installation of FEP blade repair boots for agitators and baffles.
- Installation and replacement of all types of lubricated and dry running seals on De Dietrich series 60, Philadelphia Gear PTE and Pfaudler DTW, RW and SRW drive systems.
- Preventive maintenance inspections with documented reports and summary of recommendations. (Inspections satisfy OSHA PSM (Process Safety Management) mechanical integrity requirements).
- Evaluation of used equipment with a written report of findings, including recommendations and cost estimate for all needed repairs.
- Assistance with the start-up and commissioning of one vessel or an entire plant.
- Supervision of installation of all glass-lined steel equipment, including accessories, reactors, storage tanks, columns and dryer blenders.

De Dietrich Process Systems also has several programs to benefit you and your personnel including:

- Maintenance and engineering presentations
- Hands-on training seminars
- Service Agreements (non-binding)
- Preventive Maintenance program contracts
- Regional seminars

Whatever your needs, De Dietrich Process Systems has the skilled personnel to satisfy them at competitive rates. To inquire about pricing and availability, please contact:
