

Lacquering or coating process for even coating

The coating centrifuge V 425 TT delivers excellent results when lacquering and coating smaller parts. The machine perfectly spins off excess material and is ready for plug & use. Furthermore, it has low maintenance requirements and operates economically.

Efficient production cycle

The user controls the lacquering and coating process manually. By activating the hand lever, the lacquer container filled with lacquer or any other coating material is raised and the parts to be treated are immersed in the basket. After the lid has been closed and the start button pressed, spinning starts. Basket speed, clockwise/anticlockwise cycle and spinning time can all be set manually. This guarantees even part coating. Once the spinning process is finished, the basket containing the „sticky-to-the-touch“ parts is lifted out.

Optional equipment

- > Basket made of Grade 2 titanium (weight reduction 6.5 kg)
- > Special handling device for changing the basket
- > EasyToClean coating reduces the housing's dirt pick-up

Process applications

Lacquering, coating, lubricating and zapon-treating of smaller parts and accessories, for example for the automotive industry, furniture industry and for commodities; recovery of cooling lubricants, removal of oil from metal chips, drying of galvanized parts and the recycling of paint and lacquers.

HEINKEL Drying and Separation Group

The HEINKEL Drying and Separation Group combines more than 130 years of experience, reliability and innovative power of internationally operating companies in filtration, centrifugation, mixing and drying technology.

Our **COMBER**, **BOLZ-SUMMIX**, **HEINKEL** and **JONGIA** brands have an excellent reputation all over the world.

The group offers one of the most extensive product portfolios for the pharmaceutical, fine chemical, chemical and food industries. Your quality and reliability.

We develop and produce top-quality components and full systems for separating solids from liquids and offer comprehensive after sales service.
