

# De Dietrich Process Systems Powder Handling Lunch & Learn / Webinars

At De Dietrich Process Systems, one of our missions is to inform and educate our customers, which in turn helps them to make good decisions.

Lunch & Learns or webinars give us the chance to do just that. Either in-person or virtual, these events give us the opportunity to speak directly with you to learn about the processing problems you're facing while introducing you to DDPS solids handling capabilities.

Webinars are an ideal virtual platform if you are in a remote location and want to set up an individual session in a timely manner. Lunch & Learns offer the chance for us to meet face-to-face to talk specifically about their process. While the content is similar in both formats, in-person meetings can often allow us to better understand the obstacles/issues that you are struggling with.

Here are some benefits you get from registering for one of these events:

- FOOD for in person seminars
- Interactive presentation that you get to be involved and participate in
- Educational content – could potentially qualify as Continuing Education
- Opportunities to address specific issues at your plant
- A chance to ask questions to someone who has experience in a variety of applications
- IT'S FREE!!

## *Powder Handling Lunch & Learn / Webinar Itinerary\**
